

Conservation Books

These guides can be used to help identify the great variety of local plants and animals found in this area. These guides have detailed photos or drawings to help you with identification of several common native plants and wildlife. These field guides can help students complete school assignments and they also make great gifts.

#01 - Trees of Illinois – You don't need to be an expert to appreciate trees. This field guide contains everything you'll want to know, including full-page photos and detailed information about 124 species of Illinois trees, including each tree's leaves or needles, bark, mature size, fall color, state-specific range map and more. 272 pages, soft cover. **\$14.00**

#02 - Birds of Illinois – A handy field guide of 111 bird species common to the state. It contains an easy-to-use color guide. For each bird, there is a full color picture and description, including range maps, life history, interesting facts and special author's notes. 288 pages, softcover. **\$13.00**

#03 - Critters of Illinois – A user friendly pocket guide of 50 common critters of Illinois including mammals, birds, fish, insects, reptiles, and amphibians. Includes full color photos, important information such as size, habitat, range, food, predators, life history, identifying features, diagrams of their tracks, and a fun fact section. 126 pages, softcover. **\$6.00**

#04 - Wildflowers of Wisconsin - This is your guide to 200 of Wisconsin's beautiful flowers. Full-page photos and fascinating descriptions make this a great guide for beginners and a terrific gift. The material is easily understood by those with no botanical background, but it also includes important, accurate information useful to those more familiar with plants. This user-friendly field guide is organized by color and size for simple identification of unfamiliar species. 426 pages, softcover. **\$16.00**

#05 - Seedling ID Guide for Native Prairie Plants - Young prairie plants can be hard to identify, leaving you to wonder whether you got a good stand or if you should plant again. The Central Region Seedling ID Guide for Native Prairie Plants can help you save time and money on prairie establishment or restoration projects. Jointly produced by the Natural Resources Conservation Service and the Missouri Department of Conservation, this easy-to-use field guide features 40 of the most commonly seeded native prairie grasses and wildflowers. Color photos illustrate seed, seedling, juvenile and flowering stages. Even though it is a Missouri publication, most of the plants are found locally. 92 pages, paperback. **\$7.00**
